

everythingswimming

2022-23

Fitting Instructions

Adjust the headband (see following page) by releasing the tension through the clip lock buckle, slide through buckle to the correct length. Clip headband into correct buckle position to prevent releasing whilst swimming. Carefully position lenses over the eyes with the nose piece in the upright position facing away from your face, slide the headband (which you have adjusted to the correct length) over your head. Position headband correctly. To remove, slide headband back over your head.

DO NOT attempt to adjust length of headband while it is clipped into the buckle unless you have released the tension as you will more than likely snap the headband close to the end. Before entering the pool it is suggested to dip goggles in the pool water and wet your face and hair, as this makes the goggle fitting more comfortable, gives you a better seal and activates the anti-fog feature.

Care: Treat with care as the polycarbonate lenses may scratch. DO NOT WIPE OR TOUCH INSIDE THE LENSES as you may damage the anti-fog coating. Wash goggles in fresh water after each use and dry in the shade.

DO NOT expose to excessive heat as this will damage your goggles. Use Eyeline anti-fog solution to clean your goggles, spray a small amount in each lens and dab with a soft cloth or tissue to remove excess spray.

Warning: As with anything near the eye, all care should be taken to prevent eye injuries. Children should only use goggles under competent supervision. If irritation or injury occurs, discontinue use immediately and consult a doctor. FOR SURFACE SWIMMING ONLY.

Correct Headband Usage

Eyeline headbands are designed to be 'non-slip' so it is essential to release the tension through the buckle before adjusting the length. Failing to release the tension through the buckle, the tighter you pull the headband the tighter it locks and you will exceed the natural length of any given section and snap the headband.

UV Protection

Every Eyeline goggle has added ultra-violet protection as a standard feature. Designed for the outdoor swimmer to provide essential protection from sunlight & ultra-violet light.

Anti-fog

Eyeline anti-fog models are treated using the most advanced coatings available today. Anti-fog lenses provide excellent optical clarity for all swimming conditions.

Note: Anti-fog inner lens coatings should never be rubbed or scratched as this will render the treatment ineffective. Do not use anything to clean inner surfaces that will scratch the surface. Rinse goggles in fresh water after every use and air-dry. From time to time it is suggested to use the Eyeline anti-fog spray to keep your goggles clean and to reduce 'film build-up' on the inner surface which will lessen the effectiveness of the anti-fog treatment and also reduce the optical clarity of your swim goggles.

Goggle Seals

Foam: High quality foam ensures comfort and protection for the face.

TPR: New generation Thermo Plastic Rubber is a pliable material. It provides a comfortable soft seal and leak resistant properties. This product can be recycled.

TPE: Thermo Plastic Elastomer offers 'soft-touch' characteristics with high elastic properties for soft comfortable seal & leak resistance. This product can be recycled.

Silicone: The ultimate comfort. 100% silicone seals provide the highest leak resistant properties.

No Seal: The Original 'No Seal' Racing Goggle. Top quality engineering allows this model to be worn without a conventional seal whilst still affording excellent seal properties. For the more experienced swimmer.

Headbands

Rubber: A soft elastic material for general swimming use.

Silicone: A high quality strap providing extra strength and durability.

Correct Headband Usage

for most other models except Plexus and Spectrum

1. Twist straps through the buckle gap

2. Once buckle is unlocked adjust straps

3. Twist straps back into the lock position

Correct positioning for all split, twin and dual headbands.

Correct positioning for all regular, contoured and single headbands.

Correct Headband Usage

for Plexus model

1. Twist straps through the buckle gap

2. Once buckle is unlocked adjust straps

3. Twist straps back into the lock position

Correct head straps positioning for Plexus model headbands.

Correct Headband Usage

for Spectrum/Spectrum Mirror models

1. Twist straps through the buckle gap

2. Once buckle is unlocked adjust straps

3. Twist straps back into the lock position

Correct head straps positioning for Spectrum model headbands.

Optical Correction Goggles & Lens

Designed for people suffering from Myopia (short sight). Available in -0.5 increments starting at -1.5 to -10.0 diopter anti-fog clear lens.

Without optical correction

With optical correction

How To Select Correct Optical Swim Goggles

We need your SPH readings.

Optical swim goggles do not correct astigmatism (CYL).

	SPH	CYL	AXIS	PRISM	ADD
OD	-1.00	-0.25	005		+2.50
OS	-1.75				+2.50

OD – Right Eye: usually the top value in an eyeglasses prescription chart.

OS – Left Eye: usually the bottom value in an eyeglasses prescription chart. The measurements in the OS row are for the left eye.

Optical Correction

How to care for your swim fins

The majority of damage to swim fins occurs when placing fins on your feet or when walking. It is important that you read through the following procedures to reduce the likelihood of damage and maximize the life of your purchase.

Fitting your fins correctly

Step A: Place three fingers inside each side of the foot pocket and your thumbs in the centre base of the heel pocket and fold back.

Step B: If done correctly, your fin will look like this.

Step C: Slide foot into fin as far as possible. **It is best to have both the fin and foot wet as it will make fitting a lot easier. Repeat for other foot.**

Step D: When foot is fully inserted and comfortable roll the back of the pocket up and around the heel.

Warning: Never grab the front section of the foot pocket and attempt to pull fins onto your feet. More than likely you will tear the rubber at each side of the toe area. **This action will void your warranty.**

Warning: Never try to pull on the fins by the back of the foot pocket. More than likely you will tear the foot pocket. **This action will void your warranty.**

Correct walking action helps prevent damage to your fins

Walking A: Walk backwards or forwards in short steps. Keep both feet parallel to the ground. Do not scuff or bend the blades whilst walking.

Walking B: It is a lot easier to walk backwards with your fins on. Keep both feet parallel to the ground, and lift each foot completely off the ground in the walking action. Be very careful when walking backwards to avoid any chance of tripping.

Warning: DO NOT use the fins to support your weight in the water. For children, when seated, don't allow them to 'over-bend' the fin blades. Either of these actions may cause the fin blade to crack in the rail section. **This action will void your warranty.**

How to care for your swim fins

The majority of damage to swim fins occurs when placing fins on your feet or when walking. It is important that you read through the following procedures to reduce the likelihood of damage and maximize the life of your purchase.

WARNING!

DO NOT walk in swim fins as you would normally 'heel and toe' as this may crack the side rails and void your warranty.

It is BEST to wet both the fins and feet when putting on.

It is BEST to put fins on at the pool edge or the water's edge if using in the surf.

ADVICE: Swim fins are made to aid swimming and NOT for general walking.

How to select your correct size

(For models EF4, EF8, EF40, EF50, EF60, EF80 and EF88)

FIN SIZE CHART			A	B	C	D
Australian Sizing	European Sizing	USA Sizing	Length of Foot Pocket	Width of Foot Pocket at Widest	Length of Foot Pocket Opening	Width of Foot Pocket Opening
2-4	22/24	T1	17.0cm	6.0cm	7.0cm	4.0cm
4-6	24/26	T2	18.0cm	6.5cm	7.0cm	4.5cm
6-8	26/29	0-0	19.0cm	7.0cm	7.5cm	4.5cm
8-11	30/33	0-1	19.0cm	7.2cm	8.0cm	5.0cm
11-1	34/35	1-3	20.0cm	7.5cm	8.0cm	5.5cm
1-3	36/37	3-5	21.0cm	8.0cm	8.5cm	5.5cm
3-5	38/39	5-7	22.0cm	8.5cm	9.0cm	6.0cm
5-7	40/41	7-9	23.0cm	9.0cm	9.5cm	6.5cm
7-9	42/43	9-11	25.0cm	9.5cm	10.0cm	7.0cm
9-11	44/45	11-13	26.0cm	10.0cm	11.0cm	7.5cm
11-13	46/48	14-15	27.0cm	10.5cm	11.5cm	8.0cm
13-15	49/51	16-17	29.0cm	11.0cm	12.0cm	8.0cm
15-17	51/53	17-18	30.0cm	11.0cm	13.0cm	8.0cm
17-19	53/55	19-20	31.5cm	11.7cm	14.0cm	9.0cm

Notes

1. Eyeline uses only Australian Sizing as its reference sizing.
2. Sizes shown in above chart are male sizes.
3. For female sizing we suggest you select 1 size down, for example a female 7-9 size equals a male 5-7 size.

Care for your fins

1. Avoid prolonged exposure to direct sunlight.
2. Don't leave near a heat source.
3. Rinse in fresh water after each use.
4. Never expose to chemicals or solvents.
5. To give them a good clean ONLY use mild soap and water or a rubber cleaner/preservative.

Latex

Custom Screen Printed Latex

ERLSP

Minimum quantity for latex cap printing is 50pcs
per cap colour / per weight / per logo design.

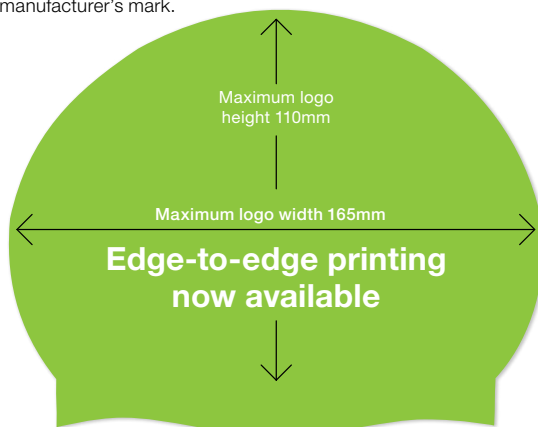

Colours in quantities of 50pcs per colour per weight can be mixed to
reach quantity break pricing.

Note: No screen charges for orders of 200pcs & over on 1 colour logo
or 1st screen on multi colour prints.

Some cap/logo colour combinations will require an additional
underbase of white to achieve best colour result. If a white is not part
of the original logo an additional screen charge will apply.

If caps are to be used for competition events under FINA rules then
this must be advised on order as restrictions are placed upon the size
of the manufacturer's mark.

All logo printed caps will come with an Eyeline logo printed on cap as
a manufacturer's mark.

**YOUR
LOGO
HERE**

Any logo which must face
the same direction on both
sides of cap when worn will
require separate screens
for each side of cap.

Note: No screen charges for orders of 100pcs & over on 1 colour logo or 1st screen on multi colour prints.

Lycra

Custom Printed Lycra

ELSCP Lycra

Minimum qty for lycra cap printing is 84pcs per fabric / per print design / per cap colour.

Available for one colour printing only.

Note: No screen charges for orders of 250pcs & over on 1 colour logo as 1 or 2 sides print or 1 middle print only. Additional screen may be required for middle panel print orders.

Poly

Custom Printed Polyester

EPSCP Polyester

Minimum qty for polyester cap printing is 84pcs per fabric / per print design / per cap colour.

Available for one colour printing only.

Note: No screen charges for orders of 250pcs & over on 1 colour logo as 1 or 2 sides print or 1 middle print only. Additional screen may be required for middle panel print orders.

All Eyeline polyester caps use the highest quality CRP polyester which is the same fabric we use for swimwear. We don't use cheaper quality polyester interlock, which has less stretch, therefore needs to come in different sizes for children's caps.

Electric Pace Clock

EPC105
Clock face 900 x 900mm
220-240 volt motor
Sweeps 1 rpm

Aluminium L-frame
supported powder coated
alloy clock face

NOTE: Clocks to be installed outdoors should consider having a face cover to 100% prevent possible water damage to the motor.

Under NO circumstances should the clock face be cleaned using a high water pressure cleaner as water may enter the motor down the spindle.

A small amount of WD40 or similar should be sprayed on the spindle where it enters the Brass Bushing to prevent any contamination build-up on the spindle.

This should be done at least every 90 days.

Australia is one large island surrounded by water. We've made the move towards the use of sustainable materials like recycled fabrics for our swimwear. Our new range of RSP fabric swimwear is made from reclaimed and recycled water bottles that were destined for landfill, spun into PET yarn then knitted into soft & durable chlorine resistant swimwear.

Reuse, Reduce, Recycle, Eco-Friendly, Less Landfill, Cleaner Oceans, Brighter Future

RSP® Chlorine Resistant Recycled StretchPolyester

RSP® Chlorine Resistant Recycled Stretch Polyester is designed for close-to-the-body styling required by today's sport and fashion swimwear.

RSP® has excellent stretch and recovery with superior shape retention, is soft to the hand with a high level of colour fastness.

RSP® is quick drying and is resistant to chlorine and salt water. RSP® is 78% Recycled Polyester, 22% Lycra®.

The Xtra Life LYCRA® Fiber resists fabric breakdown more than 5 times longer than your average chlorine-resistant spandex. Fiber breakage can cause fabric breakdown very quickly. Swimwear garments using Xtra Life LYCRA® have no significant fiber breakage even after 240 hours of exposure.

CRP® Chlorine Resistant Stretch Polyester

CRP® is designed for close to the body styling required for today's sport & fashion swimwear.

CRP® has excellent stretch & recovery with superior shape retention.

CRP® is soft to the hand with a high level of colour fastness.

CRP® is quick drying & resistant to chlorinated and salt water.

Tuff®

Eyeline Tuff® 100% Nylon is quick-drying and resistant to most pool chemicals.

Eyeline Tuff® Nylon suits are self lined and made with medium weight fabric for comfort, fit and durability.

Recycled Nylon/Lycra®

Lycra® swimwear manufactured by Eyeline uses 78% Regenerated ECONYL®Nylon, 22% Lycra®

Prime Technology advantages are:

- Resistant to chlorine, suntan creams and oils.
- Highest colour fastness values meeting the Oeko Tex
- Standard 100
- Great Fit & Comfort
- Extra Strength
- Maximum Durability and Shape Retention
- UPF 50+ Sun Protection Factor

We've made the move towards the use of sustainable materials like recycled fabrics for our swimwear. Our new range of RSP fabric swimwear is made from reclaimed and recycled water bottles that were destined for landfill, spun into PET yarn then knitted into soft & durable chlorine resistant swimwear.

Reuse, Reduce, Recycle, Eco-Friendly, Less Landfill, Cleaner Oceans, Brighter Future

DISCLAIMER: Due to continual product development, specifications as represented in this catalogue are subject to change without notice or obligation during the life of this catalogue. Colours as represented in this catalogue are the closest possible that can be obtained using a four colour process method.
