COMMERCIAL POOL EQUIPMENT & ACCESSORIES CATALOGUE

CONTENTS

Anti Wave is the global leader in the design and supply of Competition Swimming, Water Polo, Pool Deck, Leisure and Pool Programming equipment.

Anti Wave equipment was first used at the Munich Olympic Games in 1972, and has been used extensively in aquatic facilities and pools around the world since. Anti Wave specialises in complete aquatic facility fit-outs for Competition Swimming, Pool Deck, Water Polo and associated equipment including pool programmability products such as Moveable floors, SwimWalls and Bulkheads.

With a long and tested history with over 45 years of highest quality products, customer service and innovation Anti Wave products are world-renowned for their first class design, quality and durability. Our products are designed and tested in Australia to withstand the tough environments that are found on outdoor commercial pools. Our Racing Lanes feature specially formulated UV Stabilisation, anti-oxidants and colour fasteners to ensure years of reliable service.

Anti Wave has Licensed production in 8 countries – meaning that you are sure to find our products with the highest level of professional service, reasonable prices and top level of customer support near you.

ENGINEERED FOR SUCCESS

Creating products that make the pool experience better is our singular focus. It means engineering product solutions that will provide quality swimming pool deck equipment for every pool enthusiast: aquatic designers, swim coaches, pool contractors, service providers, facility managers and of course swimmers.

For a competitive swimmer it means starting blocks designed for faster, solid starts, and lane lines with superior wave quelling properties. If high energy swimming pool fun is the theme, we have a wide range of choices: slides, water play features and pool games. And for the mobility challenged we offer DDA compliant pool access products that ensure everyone can get in and out of the pool safely.

LANE LINES

LANE LINES

When performance counts

Our unique, patented design is proven to reduce wave action and creates a multidimensional barrier against waves by dispersing them along the lane line, through each individual freely spinning lane disc, and then down into the water.

Anti Wave lane lines meet a wide range of needs from recreational lap pools to international aquatic facilities for elite competition.

Our MAXI, MYTI and MIDI model racing lanes represent the cutting edge of lane design and wave dissipation, and comply with all FINA, LEN and equivalent regulations.

- Unique design quells wave action, and keeps the water calmer for swimmers
- The MIDI 110mm and MYTI 125 are suitable for competition, water polo and general pool division
- 150mm width is designed for elite competition pools and maximum wave control
- All discs are made from top specification UV Stabilised advanced thermoplastics
- Includes SuperTensioners for safe, easy tightening and removal of lane lines
- Cable is SS316 with diameter of 3.1mm and max force of 5kn - allowing higher tension and more effective wave dissipation

65mm disc	110mm disc	125mm disc	150mm disc
Ideal for junior swim schools & pool division	Adequate wave reduction for recreational swimming	Good wave reduction for competition swimming	Superior wave reduction for elite aquatic facilities

SUPERTENSIONER

The original and best

Anti Wave SuperTensioner provides simple, problem free tensioning of stainless steel lane cables and lane ropes and is superior to outdated turn-buckle technology.

- Threaded rod allows safe, simple and secure adjustment of lane ropes with no tool needed
- Stainless Steel rod with brass ferrule and glass filled polycarbonate body construction
- All stainless steel fittings are marine grade SS316
- SuperTensioner is tested up to 4kN line pressure, allowing high performance wave dissipation

STARTING BLOCKS AND RACING

VELOCITY ADVANTAGE STARTING BLOCK

Elite competition platform

Designed for fast, solid starts, the Velocity Advantage starting blocks feature strong fiberglass footboards with track start wedge on an HDPE composite base.

- Easily mounts to pool decks or bulkheads with minimal drilling
- 41cm height makes it well suited for bulkheads and end walls with 20cm - 42cm deck to water heights
- The 71cm x 81cm footboard surface is available with TrueTread™
- Track start wedge, adjustable to 5 positions, easily tucks under the footboard
- Patent pending integral backstroke start ledge is adjustable to five positions in accordance with FINA standards
- Three built in backstroke handholds – two center positions and one on each side
- Compatible with Colorado and Daktronic timing systems

+ “No Dive” & Solarguard covers available

LR850 LONG REACH STARTING BLOCKS

Removable platform with long reach base

Long Reach Starting Blocks are designed with an 850mm setback and 700mm height, allowing the platform to reach over grating channels and eliminate the requirement for a raised endwall. Available with 3 platform configurations including an elite competition platform with track start adjustable to 5 positions. The track start wedge can tuck away at the rear of the footboard.

- Fibreglass construction with 316 SS fittings
- Track start is adjustable to 5 positions, and tucks away for relay starts (excludes 600 platform)
- Available in 3 platform models
- FINA compliant (FR 2.7)
- Base: High grade 316 SS with mirror finish
 - 850mm setback from pool edge
 - Includes locking deck anchor
 - Non-slip side step
 - Custom coatings available

+ “No Dive” & Solarguard covers available

LONG REACH STARTING BLOCK TURN PANEL

Long Reach Starting Block Turn Panel

The long Reach block Turn Panel attaches to the starting block base and creates a non-slip endwall for tumble turns. Vertical adjustments can be made to accommodate the fall of the pool and optional attachment points are available for timing pads. The turn panel can be easily removed from the socket and stored when not in use. Available in two sizes: 2m & 2.4m width.

- Suitable for LR850 starting block bases
- 316 stainless steel with non-slip replaceable grating
- No additional core drilling & deck sockets required
- No additional earthing (single earthing point in block anchor)
- Adjustable foot removes any up or down movement
- Adjustable front panel accommodates fall of pool deck

+ Optional timing pad brackets available

BACKSTROKE LEDGE

Easy to use starting device

The Anti Wave Backstroke Start Ledge is an easy to use and practical backstroke starting device for swimmers to perform top performance backstroke starts. The Backstroke Start Ledge includes 5 point manual height adjustment and is suitable for connection to all standard starting blocks including all Anti Wave Blocks.

Developed in consultation with Australian Swim Team members, the Ledge is simple to install and adjust on the pool by the swimmer or coach.

- Compatible with all standard block types, and adjustable to suit a range of swimmers needs including Masters as well as elite competition swimming and training
- Marine grade anodised aluminium body with non-slip surface, Nylon Protector End Caps and Polyester Webbing with SS316 Cam Buckle
- Adjustable to 5 positions to suit each swimmers needs using simple and durable StayPut and Eyelet system. Can be adjusted to +4cm above or -4cm below water level, as well as longer adjustments to suit Master/ Youth swimmers
- Meets FINA FR 2.10 Regulations, suitable for FINA Events

PRO 1080 GOAL

Premium floating goal

The Anti Wave Pro Floating Goal was first introduced at the 1972 Olympic Games in Munich, Germany. This premium water polo goal features a powder coated aluminum frame, reinforced with fiberglass, and a tough, polypropylene net that is knotted at every intersection. The EVA foam floats offer superior, even flotation for maximum goal stability. Small deck wheels allow the goal to be moved easily along the pool deck.

- Full-sized competition floating goal
- Strong, powder-coated aluminium frame with 3m x .9m face
- Patented open corner net design to reduce ball rebound
- Net is tough polypropylene cord, knotted at every intersection
- Durable fibreglass flotation panels provide even position in the water

Suits current FINA standard: 1080mm player re-entry area

Anti Wave Pro 1080 Goal

SENIOR 1080 FOLDING GOAL

Full-sized folding pro goal

The Anti Wave Senior Folding Pro Goal 1080 is a full-sized FINA Approved competition Polo goal, dimensionally the same as the Anti Pro Goal 1080, with the added benefit that it folds flat for easy pool side storage and movement. Easy to erect and put down – to fold just pull the Rear Arms out of their sockets and fold down the Front Frame for storage.

- Full-sized competition folding goal
- Fabricated from custom powder coated aluminium extrusions and hand-laid fibreglass floats for durability
- Front Frame dimensions: 3m x .9m
- Meets all relevant FINA and LEN competition specifications
- Net is Heavy Duty, polypropylene cord, knotted at every intersection
- Durable EVA closed cell foam floatation elements
- External carry handles assist with safe and easy pool deck transportation
- Nylon Pool edge bumpers on Rear of Goal prevent chipping of pool tiles and guttering
- Open corner net configuration to reduce ball rebound
- Anti Net Clip for easy Net Installation

14-61-0123	Anti Wave Flippa Folding Goal	31kg	220cm	100cm	15cm

CLUB WALL GOAL

Wall anchored goal

The Anti Wave Club Wall Goal anchors directly into the pool deck or bulkhead via two rear support arms that can be fully adjusted both vertically and horizontally to fit existing deck anchors. The polypropylene net is knotted at every intersection, and completely covers the back and sides of the goal. The back drape net is made of heavy-duty canvas, and features a weighted bottom strip for even hanging.

- Full-sized training and social games goal
- Adjustable to fit most deep or shallow end pools
- Strong, powder-coated aluminium frame, with 3m x .9m face
- Net is tough polypropylene cord, knotted at every intersection
- Heavy-duty canvas back drape is weighted for smooth backdrop
- Two deck anchors included

WATER POLO FIELD LINES

When performance counts

Our unique Anti Wave, patented design is proven to reduce wave action and creates multidimensional barrier against waves by dispersing them along the lane line, through each individual freely spinning lane disc, and then down into the water.

- All discs are made from top specification UV Stabilised advanced thermoplastics
- Includes the SuperTensioner for safe, easy tightening of lane lines
- Cable is SS316 with diameter of 3.1mm and max force of 5kn - allowing higher tension and more effective wave dissipation

+ Custom disc colours available upon request

WATER POLO EQUIPMENT PARTS & ACCESSORIES

Mobile Storage Bin

Keep water polo equipment and games stowed and secure. Storage bin can collapse for storage when it is not needed. Includes wheels and handle for movement.

- Powder coated aluminum
- Size: 96cm x 76cm x 71cm

Ball Release System

Get a consistent and accurate start to every game. The starting ring is held in place inside the playing field by weights resting on the pool floor. The ring is pulled under water, and the ball released as players approach the ball.

POOL ACCESS FIXED LIFTS

- INDEPENDENT USE WITH REMOTE
- ADA COMPLIANT
- CORROSION FREE MATERIALS

aXs2 Fixed Pool Lift

A low profile pool lift that is an ideal access solution for community, aged-care and rehabilitation swimming pools. The aXs2 lift installs into your pool deck via a locking anchor.

- 360° rotation for transfer safety and flexibility
- Compact design requires minimal deck space
- Integrated armrests
- Sturdy and generous rotomolded seat
- LiftOperator® Intelligent Controller with 24V battery
- Full range of operation from remote control and control box
- Powder-coated stainless steel and aluminum construction
- Includes: battery, charger, battery console cover, water-resistant hand control, stainless steel anchor socket with cover, footrest and seat belt assembly, and armrests
- Lifting capacity: 136kg

Splash! Fixed Pool Lift

Designed for swimming facilities seeking to provide user-friendly access to their swimming pools. The Splash! Lift installs into your pool deck via anchor, and can be easily removed with the included caddy. Also available in an Extended Reach version for use on pools with gutter configurations requiring a longer reach.

- 344° rotation helps ensure safe transfer
- Easy to move by one person
- LiftOperator® Intelligent Controller with 24V battery
- Powder-coated stainless steel and aluminum construction
- Includes: battery, charger, battery console cover, water-resistant hand control, stainless steel anchor socket with cover, footrest and seat belt assembly, caddy and armrests
- Lifting capacity: 181.5kg*

*Lifting capacity of the Extended Reach model is 136kg. Refer to the owner's manual at www.srsmith.com/au for more details.

POOL ACCESS PLATFORM LIFT

Mobile Hydraulic Platform Lift

A hydraulic driven Mobile Platform Lift that allows users to descend into the pool from an aquatic chair or from a standing position. Designed with in-deck mounting points, electro-polished 316L stainless steel and high-density polyethylene construction. Using an in-built dual pressure control panel the user can independently descend into the pool.

Typical lift design for pools with overflow gutters

Pool Access Platform Lifts

Model/Item No.	Description
LM-10	LM-10 Platform Lift

- Hydraulic drive connected to water supply (Minimum pressure 3 bars)
- Simple retro-fit installation
- Simple user controls (from deck or on platform)
- Includes protective cover
- Foldable for storage
- Custom designed to suit any pool deck profile
- Typical design to accommodate overflow gutter (shown below)
- Patented and CE certified
- Guaranteed for 2 years
- Weight limit: 160kg

POOL ACCESS AQUATIC STAIRS & CHAIR

MAC (Mobile Aquatic Chair)

Essential for facilities utilising a ramp, zero-depth entry or movable floor. The MAC is built specifically for use in aquatic environments with a powder coated stainless steel frame to resist corrosion and a swing away arm for easy transfer.

- Front and rear stabiliser wheels eliminate the tendency of a chair to pitch forward or back while going down the ramp
- Unibody frame construction for increased durability
- Arm rests flip up for easy transfer on and off the chair
- Powder-coated stainless steel frame resists corrosion
- Rigid roto-molded plastic seat aids in user transfer by providing a stable platform that can be used for transfer support
- Weight capacity: 136kg

Mobile Aquatic Stairs

Aquatic stairs are easily rolled in to position along the pool deck to assist individuals with limited mobility with pool entry.

- Provides independent access for all users with limited mobility
- Anchors to pool deck with 2 deck sockets (included)
- Fully mobile and removeable for storage
- Corrosion free composite materials
- 3 sizes available
- Load rating: 200kg

Pool Access Aquatic Stairs & Chair

POOL ACCESS ATTACHMENTS

Pool Sling Lift Attachment

Strong, mesh sling seat assembly attaches to both the PAL2 and Splash! pool lift and is an optional accessory that can be used instead of the rotomolded seat.

Spine Board Attachment

The Spine Board Attachment works with any standard spine board (not included). Simply remove the chair assembly by pulling the attachment pin and replace that assembly with the Spine Board Attachment. One person can easily extract an injured person from a pool, keeping the injured person fully supported during the procedure.

Pool Access Attachments

Model/Item No.	Description	SHIPPING			
		Weight	Length	Width	Height
550-2000	Pool Sling Lift	31kg	220cm	100cm	15cm
900-6000	Stability Strap				
500-1000	Spine Board Attachment				

Stability Strap

The stability strap was designed to facilitate the transfer of individuals with limited or no independent upper body or trunk stability. The strap attaches the user to the chair, strapping them in for support. Compatible with all models of S.R.Smith pool lifts manufactured after June 2016.

Spineboard attachment shown on PAL lift

ACCESSIBILITY EQUIPMENT PARTS & ACCESSORIES

PAL & Splash! Lift Cover

On the PAL2, the cover protects the seat and actuator arm. On the Splash! lift, the cover protects the seat, actuator arm, and base.

Splash Caddy

Facilitates handling, transporting and storing a Splash! pool lift. Made from powder coated steel for surface protection. Caddies simplify insertion and removal of the connector shaft into the pool deck.

Batteries & Chargers

All pool lifts are powered by a 24 volt, rechargeable battery. The battery should be left on the charger when not in use.

Sign "Lift Available"

This 23cm x 30cm metal sign can be posted at your facility to let guests know about your pool lift.

CUSTOM RAILS & LADDERS

Whether it's a minor variation to one of our standard rail configurations, or something from your own imagination, look to S.R.Smith to help make your vision a reality. S.R.Smith keeps your project on track with the fastest turnaround time in the industry. From standard to custom, in a wide range of finishes, our rails can add both form and function to any pool.

- Polished 38mm & 50mm OD Tubing
- 316L Marine Grade Stainless Steel
- Any size or shape
- 1.6mm wall thickness

+ Refer to website for details on custom rail ordering process

CUSTOM COATINGS & CLEANERS

Finish with Durability and Style

A variety of finish options are available which provide a higher level of protection to our marine grade stainless steel rails and ladders. Coatings are available in a variety of colours, as well as a clear finish option.

- SRS ClearShield™ Coating
- Powder Coating
- SealedSteel®

SealedSteel®

WetTraction®
Increased traction when wet. No more slippery rails.

Thermoplastic coating fully encapsulates stainless steel to lock out corrosion.

SRS ClearShield™ Coating — a thin film ceramic coated clear finish with superior impact, scratch and corrosion resistance.

ClearShield™

Powder Coating — durable finish that is easy to maintain, corrosion and scratch resistant.

Pearl White

Aztec Black

Stone Beige

SealedSteel® — housed in a protective coating that virtually eliminates corrosion, and stays cool to the touch, even in extreme temperatures.

Note: SealedSteel cannot be used in spas and pools where the water temperature exceeds 40° C

Pearl White

Pewter Gray

Gloss Black

who we are...

With a combined history of over 150 years, International Quadratics (established in 1976) and Pierce Pool Supplies (established in 1898 as A H Pierce) have been synonymous names within the Aquatic and Leisure Industry. Both companies merged together in 2008 and for the first time the Commercial and Domestic aquatic product and service became available under the one roof.

The result is one place where a broad range of customers are given a solution to almost all of their aquatic needs. We do this through the expertise of our staff backed by an extensive range of quality furnishings, equipment and chemicals. Our commitment to customer service and satisfaction we believe has been one of the keys to our success. We are continually moving closer to our customers business providing support, training and service that is essential with the delivery of the many aquatic products available.

Our expansion of the business has seen IQ and Pierce having a nationwide presence with strategic distribution networks in all states of Australia. A New Zealand office has also recently been opened with further international investment planned.

We are passionate about the Aquatic and Leisure industry, continuing to build on our products and services, investing in research & development that ultimately bring innovations and new products to the market place. We also understand the need for goods to be provided on time. An investment in our own fleet of transport, allows us to manage our deliveries and see our products being carried with care.
